Date: 01.03.2024

- We managed to play the video next to the sensor data on a graph.
- Consent form is ready.
- The required document will be sent to the ethics council.
- We performed a complete experiment on ourselves to fully understand how the experiment should be conducted.
    - Duration: 30 mins
    - Video captured using GoPro
    - We toss a coin to decide whether to use the lift or stairs, we use a random number generator website to generate a number between 1 and 8, We go to the determined floor.
    - We use stopwatch.net to annotate the state changes.
- We will conduct the experiment with 3 real participants in the upcoming week.
